I am a recent grad looking to make a move into software engineering with a focus on building MERN stack applications and database management. I enjoy working through complex challenges and I believe that my history in the service and hospitality industry offers a unique approach to solving for the human experience.

Skills

Git	React
HTML/CSS	Redux
Javascript	MySQL
NodeJS	MongoDB
Express.js	GraphQL

🎓 Education

2021 | University of California, Berkeley
Coding Bootcamp

2013 | University of Nevada, Las Vegas
Computer Science

🌐 Languages

Tagalog - Native Proficiency
Italian - Native Proficiency
Spanish - Working Proficiency

Experience

TUBI | January 2020-Present

Perform quality assurance checks on all incoming assets from studio partners, including video, artwork, subtitles, and trailers. I also have started working with the Tech Ops team to write scripts that generate reports for our cross-functional teams.

APPLE | July 2019 -2020

Technical specialist supporting iOS devices.

SERENA AND LILY | August 2019 - 2020

Coordinated between distribution partners, manufacturers, and customers to facilitate quality customer support. I also wrote scripts and implemented tools for increasing order processing efficiency.

MISTER JIU'S | 2018 - 2019

Delivered service under high Michelin standards while working under a demanding environment.

HOTEL NIKKO | 2016 - 2017

Initially took on the role as a front desk agent which evolved into PBX and concierge duties.

UNLV IT DESK | 2011 - 2013

Maintained and updated institutional hardware and software and technology accounts.
